DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The G. W. Snouffer House (II) is located on the south side of Route 28, directly west of the intersection with New Design Road, east of the town of Point of Rocks. The house is two stories high, and "T" shaped in plan, with a gable end facade. It appears to be of frame construction, and from its general form, probably dates from the late 19th or early 20th century. A building is shown at this location on the 1862 atlas of Frederick County (the property of G. W. Snouffer); this indicates either that the present building contains portions of an earlier building or replaced an earlier building. The house appears to be in good condition. Two large barns and numerous out-buildings are located on the property, which is still being used for agricultural purposes. A bank barn is located to the south of the house, and appears to be covered with some type of concrete block. A later gambrel roofed barn is located to the west of the house.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The G. W. Snouffer House (II) is significant architecturally as an example of a house form not often seen in this area. Probably dating from the late 19th century or early 20th century, the "T" shaped house with gable end facade is unusual in the area.

The house may either contain portions of, or have replaced, an earlier building first shown on Bond's 1862 atlas of Frederick County. This building was shown on the 1873 Lake atlas as the property of G. W. Snouffer, who owned many properties in this area. Another G. W. Snouffer (I) property is F-1-157. Scharf includes the Snouffers as early settlers here (VOL. I., p. 567). Due to this ownership by the Snouffers, the property may possibly hold some local historical interest.

The house is of local significance; it does not appear likely to be eligible for the National Register of Historic Places.
